West Coast Charters' Opens a Satellite Office in CRQ (Carlsbad, CA)

Carlsbad, CA, July 7, 2010: Since 1987 West Coast Charters, a subsidiary of *West Coast Aviation Services*, has proudly fulfilled the aviation needs of Southern California's business community from its headquarters in Santa Ana, CA. Increasing demand from a more diverse client base has prompted the opening of a satellite office that will better serve our customers south of the Orange County line.

The new office is located in the Premier Jet facility at the McClellan-Palomar Airport in Carlsbad, CA (CRQ). It will primarily serve passengers on West Coast's charter and fractional flights and will periodically house whole aircraft and fractional sales personnel by appointment.

The CRQ facility represents West Coast's third administrative office, providing support to the flight operations base in Santa Ana, CA (SNA) and maintenance operations in Long Beach, CA (LGB).
