

West Coast Charters' Fractional Share Program Soars

King Air Shares are immediately available.

West Coast Charters' King Air 350

Get onboard! Fractional ownership is the fastest growing segment of business aviation. Why? Owners enjoy the benefits of aircraft ownership for fraction of the price and none of the headaches. With West Coast Charters' King Air Program acquisition costs are low, management and operational costs thereafter are predictable, and liquidity of the asset is guaranteed.

The size of share purchased determines the number of annual flight hours available to the Owner. Buyers may purchase as little as one-eighth of a King Air B200 or King Air 350 and pay *fixed* monthly management fees. The flexible program even allows you to "borrow" from your next year's allocation, when necessary.

When you buy a fraction of one King Air, you buy access to an entire fleet of King Airs. This means that you do not worry about maintenance down time or flight crew constraints. *Availability is guaranteed* with minimal advance notice.

West Coast Charters' Southern California-based fleet primarily serves the Western United States, Canada and Mexico. Owners do not pay for aircraft re-positioning within the Primary Service Area of 1000 nm. As an added benefit the program also provides access, through an interchange agreement, to West Coast Charters' fleet of charter jets which includes Hawkers, Citations, Astras and Lears.

This program provides Owners with a turnkey flight department that manages maintenance, flight crews, operations, and administration and ensures quality, convenience, safety, service and dependability at a low cost. And, unlike many fractional programs, owners fly in familiar aircraft with familiar flight crews.

The King Air B200 provides comfortable seating for up to seven passengers with numerous amenities and ample interior and exterior baggage space. The 350 cabin boasts seating for up to nine passengers

in a spacious double-club configuration with extensive interior and exterior baggage capacity.

In today's market a private plane is more than just a luxury. These airplanes provide access to ten times as many airports as commercial carriers, maximizing efficiency while minimizing costs. With all the benefits of full aircraft ownership at a fraction of the price, what are you waiting for? Contact Gary Standel at West Coast Charters for more information.
